**Sub: Accountability and Transaction of explosives accessories purchased for
use in the mines along with Site Mixed Explosives (SME) – Reg.**

Dear Sir(s),

Your attention is invited to the statutory provisions under Explosives Rules, 2008; on procuring explosives accessories viz., Detonating Fuse, Cast Booster, Detonators, etc. that are being used along with the Site Mixed Explosives (SME) in your coal mines.

As per the provisions under Rule 77 of Explosives Rules, 2008; during such procurements, a firm indent in form RE-11 [under Part 5 of Schedule V] is required to be placed with the licensed suppliers and the indented explosives should be within the licensed capacity of your explosives magazine. Please note that as soon as a consignment of explosives is received against indent in form RE-11, the same shall be fully unloaded in the explosives

magazine concerned. The required kinds and quantities of explosives accessories shall be supplied from your licensed magazine on day-to-day basis for the blasting purposes and records thereof shall be maintained in Form RE-7. This will avoid unsafe practice of parking

explosives vans loaded with explosives accessories in different places posing undesirable hazard for public life and property.

All the explosives users in the mines are requested to strictly comply with the said rules, so as to ensure accountable transaction and safe use of explosives accessories. Please note that all the explosives manufacturers and licensees holding explosives magazines for possession and sale of explosives have been advised to follow the provisions of the Explosives Rules, 2008 strictly in respect of delivery and dispatch of explosives. They have been advised to ensure that no explosives are taken out of the explosives magazines for transporting for purpose of sale without first receiving firm order of indent in form RE-11.

Receipt of this letter may please be acknowledged.

Yours faithfully,

[P.B. Yedla]
Chief Controller of Explosives
